

ANAS ABUALSUOD

Software Engineer | Full-Stack | .NET | Flutter | AI Integration

Amman, Jordan | +962789034547 | abualsoudanas868@gmail.com | [linkedin.com/in/anasalsuod](https://www.linkedin.com/in/anasalsuod) | github.com/AGIAS911

SUMMARY

Aspiring Software Engineer leveraging .NET and Flutter to build scalable, cross-platform applications.

EDUCATION

B.Sc. in Computer Information Systems

The University of Jordan | Amman, Jordan — GPA: 3.63 / 4.00

EXPERIENCE

Enterprise Architect | FMB | Saudi Arabia , Riyadh (Remotely)

October 2025 – February 2026

- Assisted in enterprise system architecture design focusing on scalability, data flow, and business alignment.

Backend Developer Trainee | Pioneers Academy | Amman, Jordan

July 2025 – October 2025

- Developed scalable backend architectures and robust RESTful APIs using ASP.NET Core and C#.
- Applied SDLC best practices and managed relational databases during a 72-hour intensive practical project under expert supervision.

Safwa Future Stars Trainee | Safwa Islamic Bank | Amman, Jordan

August 2025 – September 2025

- Supported daily operations and improved communication and problem-solving skills in a corporate environment.

PROJECTS

Intelligent HR Assistant (RAG System) | Backend & AI Developer | Tech Stack: C#, Semantic Kernel, Ollama, PdfPig

[\[GitHub\]](#)

- Architected a privacy-focused, local Retrieval-Augmented Generation (RAG) system using an N-Tier architecture to process HR policies.
- Integrated PdfPig for document parsing and Semantic Kernel with Ollama for in-memory vector embeddings and AI-driven query generation.

Automated Threat & Link Analyzer API | Backend & AI Developer | Tech Stack: C#, Semantic Kernel, Ollama

[\[GitHub\]](#)

- Developed a secure automated threat and link analyzer API, configuring custom prompts, error handling, and serialization for static analysis workflows utilizing a local Ollama instance.

Rokhsa | Mobile Developer | Tech Stack: Flutter, Dart, Firebase

[\[GitHub\]](#)

- Developed a high-performance, cross-platform mobile application using Flutter and Dart, focusing on a responsive and intuitive user interface.
- Integrated Firebase for backend services, implementing real-time database synchronization and secure user authentication.

Sugar Hero (Graduation Project) | Unity Developer | Tech Stack: Unity, C#, Spring Boot REST API Integration, TiDB

[\[GitHub\]](#)

- Developed an engaging 3D gamified mobile application using Unity and C# to help children manage Type 1 Diabetes through an interactive open-world environment.
- Integrated the game client with backend REST APIs for real-time data synchronization, secure health logging, and seamless connection to a TiDB cloud database.

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, Dart

Frameworks: ASP.NET Core, ASP.NET MVC, Entity Framework, Flutter, Node.js, Unity

Front-End: HTML5, CSS3, JavaScript, Bootstrap, jQuery, Responsive Design

Database: SQL Server, ADO.NET, LINQ, MongoDB, Firebase

Concepts: OOP, SDLC, RESTful APIs, MVC Architecture, N-Tier Architecture, JWT, Design Patterns, QA Testing

Tools: Visual Studio, Git/GitHub, Jira, Postman

Methodologies: Agile, Scrum, Waterfall

CERTIFICATIONS & ACHIEVEMENTS

- ASP.NET Core Development — University of Buckingham
- 3rd Place — Safwa Future Stars (Ranked 3rd nationwide among all program participants)

LANGUAGES

Arabic (Native) | English (Professional Working Proficiency)
